

MAËL RABOT

Developer | Computer Science Student, Epitech (Master's level, Bac+5)

Paris, France | contact@maelrabot.com | +33 6 25 03 15 50 | maelrabot.com | github.com/Lucy-Robotics

PROFILE

5th-year Computer Science student at Epitech, enrolled in the Master's program (Bac+5), passionate about technology and always looking for new challenges. I currently focus on low-level programming, object-oriented programming, web development and robotics, and I want to deepen my knowledge of video game development and graphics programming.

Co-founder and project lead of Sentience Robotics (Lucy project, an open-source ROS 2 framework for humanoid robots) and teaching mentor to 150+ international students.

SKILLS

Languages: C, C++, Rust, Python, JavaScript, TypeScript, Kotlin, PHP, Go

Web / Mobile: React, Vue.js, Flutter, Kotlin (Android)

Databases: PostgreSQL, MySQL

Robotics / Systems: ROS 2, ros2_control, URDF, Unix system programming, network architecture

Tools / DevOps: Git, Bash, ForestAdmin, RabbitMQ, continuous integration, Kanban / Agile methods

Areas: Software architecture, object-oriented programming, low-level programming, AI (CNN, generative AI), game engines (ECS), graphics programming, robotics

Soft skills: Teamwork, organization, proactivity, client relations, leadership, mentoring, teaching

PROFESSIONAL EXPERIENCE

Teaching Mentor | Epitech International

Paris, France | 2026 – Present | Fixed-term contract

- Mentoring a cohort of 150+ exchange students (25 nationalities) in an English-speaking environment
- Code reviews and technical defenses: C, C++, Python, TypeScript/Vue.js, Elixir, DevOps
- Socratic mentoring: guiding students toward autonomy, architectural thinking and debugging
- Assessment of software architecture, code quality, unit tests and design patterns
- Individual academic support and teaching coordination, tracking of student progress

Co-founder & Project Lead (Product Manager) | Sentience Robotics

Lyon, France | 08/2024 – Present | Open-source nonprofit

- Co-founded a nonprofit building Lucy, an open-source ROS 2 framework for humanoid robots
- Modular full-stack architecture; hardware abstraction in C++ / ros2_control on the InMoov platform
- Leading engineering teams: product roadmap, backlog prioritization, agile sprints (Kanban)
- Open-source hardware integration and 3D prototyping; community engagement and public documentation

Fullstack Developer | AudioWizard

Lyon / Remote | 07/2023 – 08/2025 | Contract

- Development and maintenance of SaaS solutions for hearing-aid specialists (medical management software)
- PostgreSQL database administration and query optimization
- Set up the ForestAdmin back office and trained interns
- Operational maintenance, continuous integration and incident resolution

R&D Developer | PoC Innovation Lab (Epitech student association)

Lyon, France | 03/2023 – 08/2023 | Student association

- Research and prototyping of deep learning models converting images into sheet music
- Implementation of convolutional neural networks and generative AI architectures
- Management of datasets and database pipelines

Workshop Lead & Mentor | Coding Club (Epitech)

Lyon, France | 02/2023 – 02/2025 | Student association

- Led programming workshops (Python, C, Web) for high school students; designed teaching materials
- Coordinated association members; coached participants in competitive programming and hackathons

Crew Member | **Burger King**

07/2021 – 09/2021 | *Student job*

- Worked kitchen and counter during peak hours while meeting quality and speed standards
- Handled customer feedback; trained and onboarded new employees

PROJECTS

Lucy: humanoid robotics framework | **Sentience Robotics**

Co-founder, Project Lead | 08/2024 – Present | Rust, C++, ROS 2, ros2_control, Python, React, TypeScript | github.com/Sentience-Robotics | demo.lucy-robotics.com

Modular, full-stack open-source framework for interacting with and controlling humanoid robots, based on the InMoov platform. It bridges AI-driven cognition and real-time hardware execution.

- LUCY (Platform Bridge): ROS 2 interface layer with a C++ core and ros2_control to drive actuators from web clients or AI models
- HuRI (Human-Robot Interaction): speech-to-speech pipelines, multi-level cognitive memory (short, medium, long term), kinematic grounding
- Web control panel: real-time telemetry, actuator control, cloud-assisted teleoperation; physical and simulated robots (URDF)
- Standardized interface for integrating external applications, notably AI systems
- Stewardship of the open-source ecosystem: public documentation, roadmap, issue tracking

R-Type: networked game engine

Developer | 09/2024 – 11/2024 | C++, networking, ECS | github.com/ASM-Studios/R-Type

- Development of a networked game engine in C++
- Implementation of an ECS (Entity Component System) architecture

AREA: task automation platform

Developer | 11/2024 – 01/2025 | React, Flutter, Go, RabbitMQ | github.com/ASM-Studios/ARE

- IFTTT-inspired platform for building workflows between services
- Web (React) and mobile (Flutter) interfaces, Go backend with a microservices architecture
- Implementation of OAuth, 2FA and asynchronous communication via RabbitMQ

EDUCATION

Master's in Computer Science, Expert in Software Engineering & Information Technology (Bac+5) | **Epitech**

Lyon, France | 09/2022 – 07/2027

- 5th year: low-level programming, OOP, web development, robotics; video games and graphics programming
- Unix system programming, C/C++, network architecture, software architecture
- Epitech Ambassador (open days, presentations to prospective students)

Computer Science Exchange (International Engineering Program) | **Chung-Ang University**

Seoul, South Korea | 09/2025 – 07/2026

- Advanced computer science courses (distributed systems, robotics) and international software development collaborations

Scientific Baccalaureate (Mathematics, Computer Science) | **Lycée International de Ferney-Voltaire**

Ferney-Voltaire, France | 2018 – 2021

- Bilingual international curriculum; president and representative in student organizations

LANGUAGES

French: native | English: C1
